

BIDISHA BHADURI

(+91)7481800473 | [GitHub](#) | [LinkedIn](#) | itsbidishabhaduri@gmail.com | [Portfolio](#) | Bengaluru, Karnataka
Engineer Turned Data Scientist | Building at the Intersection of AI, Data, and Intelligent Systems

WORK EXPERIENCE:

Packaged Application Development Associate, Accenture Solutions Pvt Ltd, Bengaluru, Karnataka

July 2024 – Present

- Supported data integration and reporting workflows for a global healthcare client, improving data quality and reporting efficiency through cross-functional collaboration.
- Maintained data interfaces and documented ETL issues to optimize reporting operations and client support.

Research Intern, Indian Institute of Technology, Bhubaneswar, Odisha

May 2023 – August 2023

- Worked on Pedestrian Attribute Recognition, Scene Understanding, Person Identification, and Attribute Retrieval, training a model with 25+ attributes from over 10,000 pictures.
- Integrated the models with object detection code to detect attributes of pedestrians to increase the precision in attribute recognition, ensuring optimal performance.

Web Developer, Indian Railways, Bhubaneswar, Odisha

May 2023 – July 2023

- Led a 5 member team to build an automated billing system that reduced manual effort by 70% and billing errors by 30%.
- Architected a functional website, leveraging MySQL, Django, and Python, to create seamless user experience; implemented robust backend with secure authentication, resulting in increase in user engagement and 25% decrease in login errors.

PROJECTS:

Job Salary Prediction | HR & Compensation Analytics

- Developed an end-to-end salary prediction pipeline using 250,000+ job records, performing EDA, data preprocessing, and feature engineering. Evaluated Multiple Linear Regression, Polynomial Regression, Ridge, Lasso, and Elastic Net models, with Polynomial Regression achieving the highest CV R^2 (0.9810) and the lowest RMSE (5,170).
- Core Algorithms:** Scikit-learn, Multiple Linear Regression, Polynomial Regression, Ridge Regression, Lasso Regression, Elastic Net Regression, GridSearchCV, One-Hot Encoding, Ordinal Encoding, Feature Engineering, Model Evaluation.

Bank Marketing Campaign Analysis | Banking & Marketing Analytics

- Analyzed 41,000+ customer records through exploratory data analysis to identify key factors influencing term deposit subscriptions, uncovering actionable insights such as customer subscriptions increasing with campaign contacts up to an optimal threshold before declining, enabling more effective and data driven marketing strategies.
- Technical Stack:** Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Python (Pandas, NumPy, Matplotlib, Seaborn).

Personalized Skincare Recommender | Recommendation Systems & NLP

- Developed a content-based recommendation system for 1,000+ skincare products, leveraging TF-IDF vectorization and cosine similarity to generate personalized recommendations. Enhanced recommendation quality through weighted feature engineering and an allergen-aware filtering mechanism to improve relevance and product safety.
- Model & Frameworks:** NLP, TF-IDF Vectorization, Cosine Similarity, Streamlit, Content-Based Filtering, Recommendation Systems

PAR: Pedestrian Attribute Recognition | Computer Vision

- Developed a multi-stage pedestrian attribute recognition pipeline by integrating YOLOv3 based person detection with a ResNet-50 based attribute recognition model, enabling automated extraction and visualization of 12+ pedestrian attributes from real-world surveillance images.
- Methodologies:** Object Detection, Pedestrian Attribute Recognition (PAR), YOLOv3, ResNet-50, Market 1501, Cross-Dataset Correlation Analysis, Image Processing.

TECHNICAL EXPERTISE:

- SKILLSET:** Data Science, Data Analytics, Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision, Statistical Modeling, SQL, Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, Data Visualization, Neural Networks, Mathematics, Natural Language Processing, ML Pipeline, Optimization, Deployment, Statistical Analysis, Predictive Analytics, Machine Learning Algorithms, Problem Solving, Analytical Thinking, Business Analytics, Data Processing, Communication.
- TOOLS:** Jupyter, Spyder, Python, Git, GitHub, MySQL, Numpy, Pandas, Scipy, Statsmodels, Matplotlib, Seaborn, Scikit-learn, XGBoost, TensorFlow, Keras, Nltk, OpenCV, Streamlit, Transformers (GPT-2), Anaconda.

EDUCATION:

Birla Institute of Technology & Science, Pilani, Rajasthan

2025 – 2027

M. Tech in Data Science and Engineering, WILP Division

GITA Autonomous College, Bhubaneswar, Odisha

2020 – 2024

B. Tech in Computer Science and Engineering, CGPA: 9.16

CERTIFICATIONS:

- [Google Cloud Certified Generative AI Leader](#)
- [Microsoft Certified: Azure Data Scientist Associate \(DP-100\)](#)
